Major Vehicle Accident, Santa Rosa, Sonoma County

On 02/05/18 at 1115 hours, The Santa Rosa Fire Department reported to the California State Warning Center (CSWC) that at 0926 hours, a major vehicle collision occurred in Santa Rosa, Sonoma County.

- Approximately 10 vehicles were involved and 6 persons were transported to 3 local area hospitals.
 - Injuries were reported to range from major to minor.
- Initial reports indicated a truck carrying fire debris was heading down Fountaingrove Parkway when it slammed into multiple vehicles due to a break failure.
 - The vehicle was operating under a contract for debris removal with the State of California.
 - The contractor, Environmental Consultants and Contractors Inc. (ECC), contracted the vehicle driver through Anvil.
- The US Army Corps of Engineers (USACE) has ordered all debris removal contractors to a safety stand down in order to conduct safety and Department of Transportation (DOT) brake inspections on all vehicles.
- Less than 300 gallons of vehicle fluids were released, impacting a storm drain.
 - Hazardous Materials Spill Number: 18-0790.
 - CSWC made all notifications per Standard Operating Procedures (SOP).
- Cal OES Duty Officers are continuing to monitor the situation and are providing updates as they become available.

WEATHER SYNOPSIS BY REGION

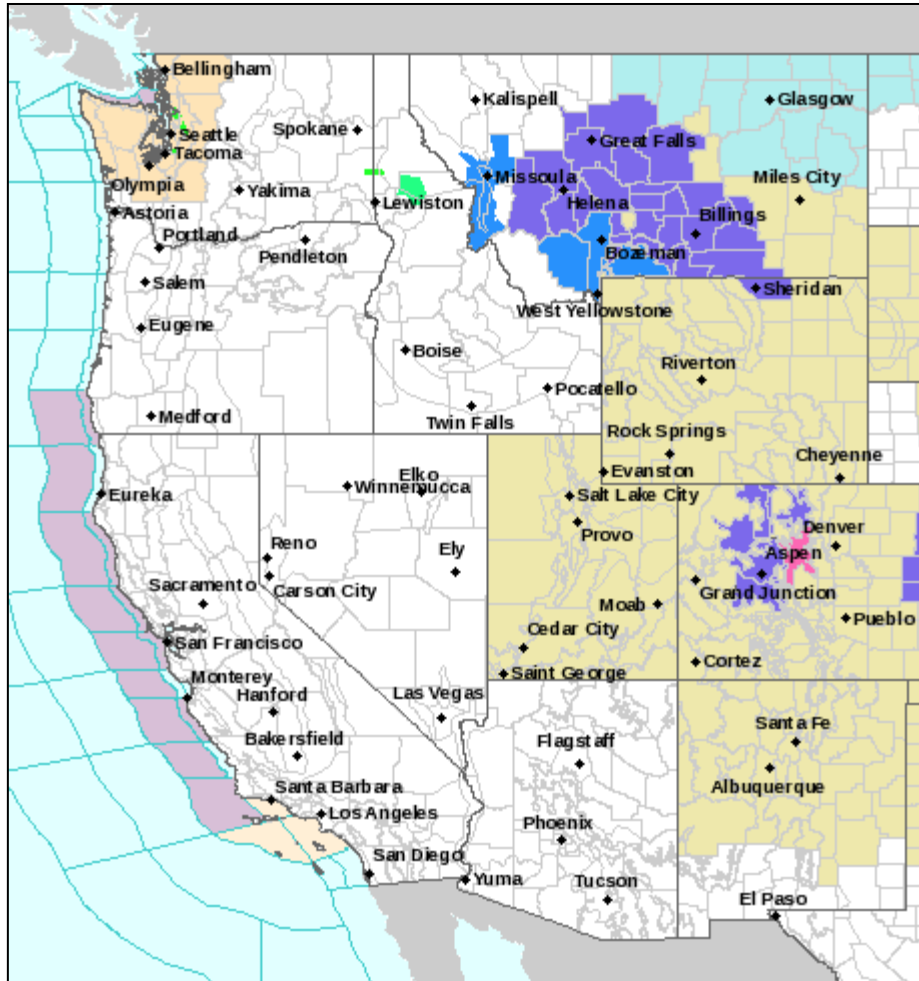

NORTHERN CALIFORNIA

Strong high pressure just west of California will be stationary through Friday. This pattern will produce mostly clear skies and well above normal temperatures under a dry northwest to north flow aloft. Afternoon temperatures will be as much as 20 degrees above normal with minimum relative humidities (RH) which should reach 18-28%. North to northeast surface winds will gust to 25 mph or so in the typical areas from the western Cascade-Sierra slopes to the coast can be expected each night and morning. However, a stronger period of north to northeast offshore winds will occur tonight and Tuesday, with peak gusts reaching 30-40 mph. These winds will be on the western Cascade-Sierra slopes, throughout the Sacramento Valley and surrounding foothills, mid and southern coastal areas, and in the wind-prone portions of the Bay Area tonight and Tuesday. Computer models are showing a potentially stronger wind north to northeast wind event Friday evening through Sunday afternoon, with peak gusts reaching 50 mph or more in the same areas.

SOUTHERN CALIFORNIA

The strong ridge of high pressure that has been off the California Coast for the last week will weaken slightly bringing a few degrees of cooling and a little higher humidity to the region through Tuesday. Maximum temperatures will be in the upper 50s and 60s across the mountains and in the 70s to low 80s in the valleys. Minimum humidity will be mainly between 12% and 25% away from the San Joaquin Valley and coast. Winds will be light through Tuesday. The ridge off the California Coast will strengthen again causing temperatures to rise to 10 to 15 degrees above normal and minimum humidity to drop into the single digits and teens Wednesday and Thursday. There will be local northeast to east winds of 10 to 20 mph with gusts to 35 mph across the mountains and below the canyons and passes of Southern California Wednesday morning through Thursday morning. Temperatures will slowly cool and humidity will gradually increase Friday through this weekend as the ridge of high pressure off the California Coast weakens.
